

CRIO Council Executive Summary

The CRIO Council meeting took place on 2023.05.02 at 12:00 pm MT via Zoom.

Meeting Goals

The CRIO Council Meeting goals were:

- Present and discuss the new Health Data Compass data delivery strategy.
- Build an analytics request working group to analyze current data analytics needs and build a data analytics strategy.
- Communicate the Artificial Intelligence guidelines to the CRIO Council members and task the CRIO Council members to explain the Artificial Intelligence guidelines to their Schools and Research Groups.

Agenda

- Approve prior meeting minutes
- Collaborative research data - Bruce Dye and Dallas Martin
- New Health Data Compass data delivery/service center model
- Analytics request WG proposal
- AI (Chat GPT) strategy
 - [Webpage draft](#)
- Slack considerations for research
- New Business

Key Discussion Points

The key discussion points during the CRIO Council were:

- An update of the new Health Data Compass data delivery/service model was provided to the CRIO Council by Michelle Edelman and Sarah Ayala. During the update Michelle Edelman highlighted that the new data delivery model is being built to increase productivity and solve the data delivery backlog.
- Nichole Carlson provided an overview of the data analytics landscape at the University of Colorado Anschutz. During the presentation Nichole Carlson highlighted how difficult it is for the researchers to find the right resources to do biomedical data analysis.
- Melissa Haendel explained the potentialities and dangers of Generative Pre-trained Transformer tools like Chat GPT. During the presentation Melissa Haendel highlighted that none should be using Generative Pre-trained Transformer tools (e.g. Chat GPT) to process HIPAA data and PHI data. A web page is being created to help disseminate the Generative Pre-trained Transformer policy across the Anschutz Medical Campus.

Next Steps

In the next CRIO Council meeting:

- Bruce Dye and Dallas Martin are going to present the collaborative research data approach to the CRIO Council.
- Sarah Ayala is going to present the New Health Data Compass data delivery cost model.
- An analytics request working group is going to be created to analyze data analytics needs and build a data analytics strategy.
- The Slack considerations for research and new business agenda topics are going to be addressed during the next CRIO Council meeting.
