

CRIO Council Executive Summary

2022.11.08

Executive Summary

- Minutes from previous CRIO Council meeting were approved
- An overview of the Palantir Pilot was presented:
 - The Palantir Pilot aims to support new data feeds from UCH, supporting greater data provenance and a multi-modal data integration and analytical environment
- Data Architect position:
 - A Data Architect position is being created and will be posted soon. This position aims to help to develop data architecture for clinical data management and integration with campus research systems
- NIH [DMSP WG](#) updates:
 - The DMSP WG is comprised of representatives from many units
 - Town halls for the NIH DMSP will provide an overview of the new policy and answer research community questions
 - The CRIO Council talked about the need of de-identification resources for clinical data
 - The WG gave an update on financial modeling, template building for the different sections of the DMSP, and centralized ticketing for researcher support
- Research Computing updates:
 - The GCP working group is working closely with the Tislab/Monarch project to migrate and evaluate a public data project to the new campus GCP environment
 - A campus-wide research computing strategic plan is being planned.
- New Business:
 - The CRIO Council discussed the need for a CRM Project, and a specialized data storage for Clinical Data.
 - The CRIO Council Members will share ideas for new campus-focused projects in the next CRIO Council Meeting.
