

Biological Spill Kit Contents

Every lab should have a biological spill kit in place for use when a spill occurs.

Spill kit contents should include:

- 10 spill pads
- Nitrile gloves
- 2 pairs shoe covers
- 2 red biological waste bags
- 1 pair long-cuff thick dish gloves
- Tongs
- Whisk broom and dustpan
- Spray bottle for disinfectant
- Appropriate disinfectant (i.e., household bleach)
- CAUTION spill sign
- Spill cleanup instructions
