

Office of Laboratory Animal Resources (OLAR) is obligated to recover the costs associated with the procurement and care and use of animals. These costs are billed to investigators monthly. Per Diem rates for animal care or direct charges for personnel costs and supplies are based on a cost analysis and recovery program outlined by NIH Cost Analysis and Rate Setting Manual for Animal Resource Facilities.

The following tables provide Per Diem rates for the care and housing of laboratory animals. Per Diems cover the following basic services: feed, health checks, cage changes and cleaning. **External Customers are charged an additional 26% Per Diem Charge.**
